### Safe

The New Daay Bin Paddle Sweep is engineered to the most current specifications in the industry. The sweep has no dangerous augers and simply moves the grain with flexible rubber paddles.

### Durable

Explosion proof, all-weather quick change motors and foam-filled, run-flat, tractor tread tires are just a couple of the quality products used to create the New Daay Bin Paddle Sweep. The Sweep is designed to be fully submersed in grain, and can be manufactured to fit inside virtually all grain bins available today.

### Affordable

With the flexible rubber paddles, almost all of the grain is swept from bin floor with the New Daay Bin Paddle Sweep. The Sweep also makes for less auger sweep injuries, unnecessary entry into bins, and insurance claims!

### Features

- Can be variably driven by a VFD
- Moves grain gently and evenly to sump
- Housing is made out of 10 ga. material
- Explosion proof motor
- The electric motor is protected from commodities within the bin by a steel cover
- Adjustable chain and motor mounts
- Weight kits for increased traction on the drive wheels come standard on all Sweeps
- Pivot sections on Sweeps over 24' in length. Allows Sweep to follow the contour of floor
- Dual drives on Sweeps over 30' in length
- Triple drives on Sweeps over 44'6"

Tires are foam filled, with a tractor tread. Drive tire size is 13 x 5.00-6 Super Lug.

Design allows Sweep to follow contour of floor.

Moves grain gently and evenly to sump with flexible rubber paddles.

Carries as much grain as the job requires.

“Safety is our number one concern at our operation. It is virtually impossible to get hurt by the Daay Sweep. Besides safety, another great advantage is how it performs. If you run it around the bin twice it virtually gets all the grain. Every other bin sweep we used left 2” to 3” on the bin floor we had to deal with. We love our sweeps.”
