### THE HISTORY

In the late 1950's, Sioux Steel purchased the number one auger manufacturer, Koyker Manufacturing Company, which was located in Hull, Iowa. Koyker’s product line was expanded in the mid 1960’s, with the addition of a line of front-end tractor loaders and grain cleaners.

In the 1980’s, Sioux Steel relocated it’s Hull, IA facility, and its product lines to the Lennox, SD plant location. With the entire Koyker Division now located in Lennox, SD, Koyker re-focused and expanded their product line-up to include loader models for tractors ranging from 20hp to 255hp. This is the broadest loader line-up in the country. The company has expanded its product line to offer the RBT 7000, Post Pounder/Puller and much more. Koyker is an innovative leader, engineering it’s products to offer the latest in design and efficiency.
